

Replacement Page 1, 1st Paragraph

BACKGROUND OF THE INVENTION

The present invention concerns cholesteryl-3-hydroxy-bisphosphonic acid derivatives and their soluble salts or hydrates and pharmacologically active conjugates, a method for their manufacture as well as their use for treating diseases.

Background

Replacement Page 5, 3rd Paragraph

The afore described components have a plurality of positive properties in the treatment of the aforementioned diseases as well as in the administration of active ingredients.

SUMMARY OF THE INVENTION

Replacement Page 11, 1st Paragraph

DESCRIPTION OF PREFERRED EMBODIMENTS

Examples

Example 1: preparation of cholesteryl-3-hydroxy-bisphosphonic acid

Cholesteryl chloride was reacted via the corresponding Grignard compound to the carboxylic acid (yield: 35 %). This product is then converted in the presence of oxalyl chloride into the acid chloride (yield: 95 %)
